

RELATIONAL DATABASE MANAGEMENT

I. Create a **Supplier** table as shown below : (for questions from 1 to 10)

Sup_No (Primary Key)	Sup_Name	Item_Supplied	Item_Price	City
S1	Suresh	Keyboard	400	Hyderabad
S2	Kiran	Processor	8000	Delhi
S3	Mohan	Mouse	350	Delhi
S4	Ramesh	Processor	9000	Bangalore
S5	Manish	Printer	6000	Mumbai
S6	Srikanth	Processor	8500	Chennai

- 1) Write an SQL query to display supplier numbers and supplier names whose names start with 'R'
- 2) Write an SQL query to display the names of suppliers who supply Processors and whose city is Delhi.
- 3) Write an SQL query to display the names of suppliers who supply the same items as supplied by Ramesh.
- 4) Write an SQL query to increase the price of Keyboard by 200.
- 5) Write an SQL query to display supplier numbers, supplier names, and item price for suppliers in Delhi in ascending order of item price.
- 6) Write an SQL query to add a new column called CONTACTNO.
- 7) Write an SQL query to delete the record whose item price is the lowest among all the items supplied.
- 8) Create a view on the table which displays only supplier numbers and supplier names.
- 9) Write an SQL query to display the records in descending order of item price for each item supplied.
- 10) Write an SQL query to display the records of suppliers who supply items other than Processor or Keyboard.
